**Date: May 24, 2007**

### **Apparatus Order 2007-4: Use of Traffic Signal Devices at Company 39 & 43**

All apparatus responding on emergency incidents from Station 39 and 43 will use the traffic signal controls before responding from the respective station. All unit officers will be responsible for ensuring the devices are activated before the crew responds on an emergency incident. The traffic signal device allows the traffic in front of Station 39 and on Route 3 by Station 43 adequate time to stop and allow responding apparatus to enter the busy highways.
