

Forensic Fire Fatality Investigation

April 30—May 4, 2018

Pasadena, TX

This unique course provides participants the opportunity for hands-on, science-based investigative fire death training utilizing live-burn training aids. Instruction will be on proper systematic processes for crime scene management from the initial scene approach through data collection, documentation, and evidence collection.

Prerequisite:

TEEX Crime Scene Investigation

TEEX Forensic Photography I

TEEX Forensic Photography II
