

CodeRED Text to Enroll

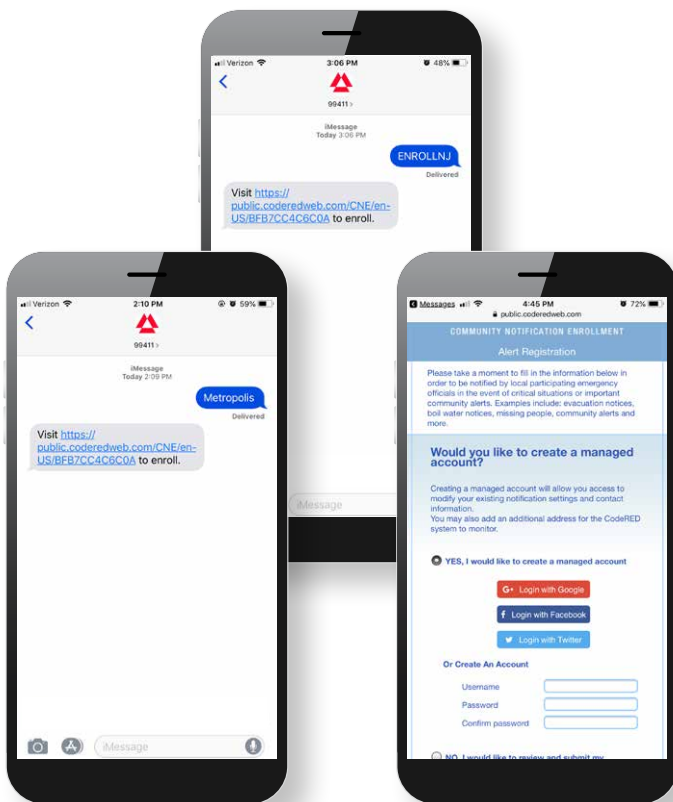

Drive registrations with a text to register mobile program

Provide residents with a quick and easy way to register for CodeRED from a smartphone.

Text to Enroll is a great tool to help build registrations for CodeRED by providing residents with a mobile-friendly opt-in process. With this mobile program, individuals can text a keyword—like a city or county name—to 99411, and receive a response back containing the Community Notification Enrollment (CNE) link for that area.

For example, Metro City selects the word “Metropolis” to use as the keyword for their city. Residents and visitors text “metropolis” to 99411 to receive a direct link to Metro City’s CNE form.

This standard feature is available for CodeRED customers who have the CNE enabled on their organizations account to help build enrollments by providing a mobile-friendly registration process with an easy-to-remember keyword and shortcode.

Create a custom keyword for your area, whether you use your city or county name.
